The AltumPRO Highbay range features a durable die-cast aluminum housing, built to withstand the toughest conditions with an IK08 rating. Equipped with high-performance LED chips, it delivers an impressive 24,000 lumens at 160 lm/w. The AltumPRO is versatile, offering Tri Wattage settings of 120W, 150W, and 200W, easily adjustable with a switch. Each fitting includes a minor adjustment feature, enabling you to fine-tune settings between the three main wattages. Additionally, it has a tri-color switch with 4000K, 5000K, and 6000K options, delivering natural, bright light that enhances productivity and efficiency. The range is complemented by a comprehensive selection of accessories and a plug-and-play microwave sensor, making it the ultimate solution for all your commercial and industrial lighting needs.

Dimmable
