

Fire & CO safety experts

## Carbon monoxide alarms

Carbon Monoxide (CO) is an invisible, odourless, & tasteless gas that poses a lethal threat. Our CO alarms identify the presence of Carbon Monoxide gas emitted by the combustion of carbon-based fuels such as gas, wood, oil, & coal. Perfectly suited for fuel burning areas & kitchens where the risk of CO pollution is greater. Espire<sup>®</sup> CO alarms provide an early visual alert of rising concentration levels of carbon monoxide prior to full alarm activation for extra safety.
