

Technical Specification

Product Code: GM050BKAB
 Description: 1 Module Dimmer Mounting Kit

General Information

|                                |                                                                                                  |
|--------------------------------|--------------------------------------------------------------------------------------------------|
| Dimensions                     | 24.5mm (W) x 50mm (H)                                                                            |
| Aperture Dimensions            | 20mm (W) x 35mm (H)                                                                              |
| Module Frame Finish            | Black                                                                                            |
| Module & Control Button Finish | Antique Brass                                                                                    |
| Materials                      | Body & Insert: Nylon<br>Control Button: Nylon<br>Insert & Control Button Covers: Stainless Steel |
| Plate Fixing Centres           | 60.3mm                                                                                           |
| Back Box Depth                 | 47mm                                                                                             |
| Operational Temperature        | -5°C to +40°C                                                                                    |
| Warranty                       | 10 Years                                                                                         |
| Standards                      | BS 5733: 2010                                                                                    |

Additional Information

Ensure that the mains supply is isolated before commencing installation and refer to the circuit diagram with the relevant product.  
 Bare earth cables must always be covered with appropriate sleeving and wired to the earth terminal.

Interchangeable Modules

- MD9014: 100W Dual Mode LED Dimmer Module
- MD9001: 6A Push ON/OFF (Dummy Dimmer / Non Dimmable) Module
- MD9010: 1-10V Analogue Rotary Dimmer Module
- MD9022: 40-250W Leading Edge Dimmer Module
- MD9042: 60-400W Leading Edge Dimmer Module

UK Design Registration: 3015621
