i-wifi01

The Eaton Wifi adapter is an easy to configure wireless network device designed for use with the next generation of Scantronic i-on panels.

Powered, connected and installed internally, the Wifi adapter eliminates the need to run an Ethernet cable to a local network router.

The connectivity features of the generation two panels including Eaton SecureConnect™ App and Cloud control and IP cameras are all supported over the wireless connection.

At a glance...

- Provides wireless network connectivity
- Compatible with Generation 2 panels
- Connected, powered and installed internally
- Converts wired Ethernet into a wireless signal
