

Skytile® Base CCT TP(a) UGR and TP(a) Range

Installation instructions for Skytile® Base recessed LED panels

Warnings & Cautions

- To avoid electric shock, serious injury or property damage, isolate power before installing, removing or servicing the product.
- It is recommended that luminaires are installed by a qualified electrician to ensure the installation complies with the local current wiring regulations.
- Any broken or damaged parts should be replaced as soon as possible. JCC will not accept responsibility for claims arising from sub-standard installations.
- This product is for indoor use only and should not be covered by any insulated material.
- It may be necessary to upgrade your MCBs to allow for increased inrush current.
- These products are designed for connection to a mains supply of 220-240V~ 50/60Hz.
- It may be necessary to upgrade your MCBs to allow for increased inrush current.

40W	4600/115	5100/128	4900/123	TP(a) 1200 x 600

Note: the non-dimmable version driver terminal connection is an 8 pole loop in/loop out with earth provision and permanent live for continuous wiring.

Installation procedure

Standard non-dimmable/dimmable luminaire installation

- Remove the ceiling tile or tiles from the location where you wish to install the LED panel.
- Wire the LED driver to the mains supply as indicated in figure 1. Or 1.a. As shown. If a dimmable variant, connect the dimming control wires (DALI/1-10V/Switch dim or DSI) shown in figure 2.
- Move LED panel into the ceiling aperture and when positioned halfway connect the driver low voltage output to the LED panel (luminaire) as shown in figure 1.a.
- Select preferred colour temperature using the in-line switch on the rear of the panel next to the DC input cable. **(Always isolate power before changing CCT)**
- Position the LED panel into place in the grid ceiling then turn on the power supply to test the fitting operates correctly.

Emergency packs available: JCEM002 and JCEM002ST
