

Operation

- You will need to download the TUYA SMART app on to you phone or tablet.
- This is a very simple app to programme and to control the fused Spur from anywhere via the internet.
- You will then need to register by following the instructions on the screen.
- You will need to power up the switched spur close to the router and mobile/tablet. Press the round reset button for 5 seconds and confirm the blue indicator is rapidly blinking. The pairing process must be completes within 3 minutes.
- Enter your wi-fi password and the process of pairing and connecting will take place, once connected you can personalise the name and icon of your device.

iOS or Android App
